REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Prior art of record do not disclose a method for generating three dimensional form data in which a three dimensional form data representing a three dimensional form model is prepared; a plurality of two-dimensional horizontal closed curves encircling the three dimensional form model but having a space to the three dimensional form model, and a plurality of vertical lines intersecting the closed curves to the three dimensional model are projected around the model; the group of curves can be modified with adding, deleting, or moving operation.

2. Remark: The final rejection issued on February 6, 2004 suggests illustrating the coordinates, wx, wy, AX1, and point R in the drawings. However, upon closed examination, it is decided that such the illustration is not necessary because the world coordinate of two dimensions wx, wy should be well known and should be clear to the reader without supported illustration; the axis AX1 have been illustrated in fig.9A-9C; the point R is defined in the specification page 21, lines 1-5 as a projected point of the point Ra onto the three dimensional model, the point Ra is defined as the user input point generated when a user selects point at a longitude BCP or meridian BCM (fig.9A) and drags the point with the pointing device, the point R should be clearly defined from the specification page 21, lines 1-5 without further illustration on the drawings.
